DIGITAL MAILING SYSTEMS

PRINTERS TABBERS FOLDERS AND INSERTERS SOFTWARE DIGITAL MAILING SYSTEMS

THE ULTIMATE SOLUTION FOR HIGH VOLUME MAIL PROCESSING

DIGITALLY SUPERIOR

The DP1000™ Digital Mailing System is a new and dynamic system that takes mail processing speed to a new level. This high speed system is setting new records for simplicity of use and outstanding processing speeds.

Faster Processing Speeds

By processing up to 260 pieces per minute, the DP1000™ gets your mail out the door in speeds unequaled by any other system.

Eliminate Going To The Post Office

From the digital control panel, you can acquire the postage you need to reset your meter through the internet 24 hours a

day, 7 days a week with our digital on-line postage resetting system.

Communicate on the Envelope

The DP1000's includes 7 envelope advertisements and 10 postal inscriptions in memory. These inkjet printed messages are crisp, razor-sharp and easy to read. Now you have the opportunity to communicate on the face of your letters and parcels.

Technology for Today and Tomorrow

The DP1000™ system's digitally printed and encrypted postage meter stamp satisfies all current and anticipated USPS postal regulations.

EASY ACCESSIBILITY MAKES FOR EASY OPERATION

The design of the DP1000™ is a revolutionary "in clear sight" and "up front accessibility" configuration which makes it one of the easiest systems to operate that you will ever come across.

Easy To Operate Control Center

Located on the very top of the system is the digital control center. Easy to read prompts instruct operators through every aspect of processing including programming, postage refilling, the systems operation, and performing complete diagnostics.

Easy Access To Everything Is Right In Front Of You

The entire system is at your fingertips. Everything from weighing the envelope feeder, thickness adjustments, the sealer, access to postage tapes, and the stacker is in the front of the system, accessible and in clear sight making it extremely operator friendly.

Complete Accountability with Reduced Keystrokes

The system tracks and reports expenses for 25 accounts, with 100 or 300 available as option. These accounts can be set-up in memory and speed coded for quick selection reducing keystrokes thereby saving time.

DETAILS - DP1000™ DIGITAL MAILING SYSTEM

1. Handles a Variety of Mail

Mixed mail feeding saves time. Feeds up to 3/4" thickness for maximum flexibility.

2. Quality Imprints

Auto sensors automatically sign mail for quality imprints.

3. Control Center Offers Ease Of Use And Access To Services

Easy to read prompts instruct operator through the systems operation, processing including the programming of preset jobs, postage refilling, and performing complete diagnostics. Domestic and International rates are included and updated automatically.

4. Quality Sealing of Mixed Mail

The DP1000™ sealer gives you a quality seal on each and every piece of mail it processes with the tip to top sealing feature, including on mixed envelope flaps. It can process both open and closed flaps in the same feed stack to help eliminate important business communications being lost or opened because of a poor glue seal plus securing the envelope contents.

5. Optional Weigh As You Go

Weigh as you process mail at the rate of up to 130 pieces per minute saves time.

6. Flats and Parcels Fly Through

Using an adhesive or gummed roll, the DP1000™ makes quick work of thick envelopes and parcels. It automatically dispenses up to 50 tapes at a time of the same denomination.

7. Interfaced Weighing Platform

Handles a wide variety of mail. Calculates individual piece weights as they are removed from the scale helping to speed your processing time.

8. Stacking Options Provides Flexibility

Neatly stacks mail for optimum productivity.

9. Perfect For the Office Environment

Console maximizes space. This highly reliable system has been engineered for minimal downtime and long term quality operation.

Prints digital IBIP compliant mail stamps.

Weighing As You Process, Accurate Feeding And A Remote Scale Dramatically Increases Your Productivity

This is one system that can process everyday conventional mail quickly including different sized envelopes and small parcels. That's because of the enhanced optional weigh as you go feature, the envelope feeder and remote digital scale all work together to increase productivity.

Weigh As You Go

Envelopes of up to 16 oz. in weight are weighed as they are processed at speeds up to 130 pieces per minute increasing productivity by eliminating manual weighing.

Versatile Feeding

The DP1000™ system's versatile feeding minimizes thickness and size adjustments. It can easily handle material up to 3/4" thick with sizes ranging from post-cards up to 13" x 15" flats.

Increase Productivity

With optional features like differential weighing for faster processing of mixed weight and size parcels and the optional DP1000™ power stacker, you can increase your stacking capacity. Plus, the digital scale automatically sets the postage meter at the correct postage thereby eliminating any chance of manual keystroking errors.
