

ACCUFAST[®] P8

ACCUFAST P8 Print Module

ACCUFAST listened to our customers and created a successor to the P6 - the 6 pen ink jet that started it all. Introducing the **ACCUFAST P8** table top ink jet print module.

The P8 is just a bit bigger, faster and a whole lot stronger than the P6. It has twin 2 inch imagers mounted to a precision aluminum bar. Each imager may be positioned independently along the bar and raised to an impressive publication swallowing .75 inch if need be.

The paper transport is over 17 inches wide to allow extra large sheets to pass, yet completely covered for safety, cleanliness and appearance. The P8 can be integrated into a system with a variety of ACCUFAST feeders, conveyors, dryers and stackers, some linked electronically for sorting and curing efficiency.

The ACCUFAST P8 taking up where the P6 left off. Just what you'd expect from **ACCUFAST**.
